

Pre Technical Chiloe Island and Lakes & Volcanoes District

04 Days / 03 Nights

Day September 1st. 2023 Santiago de Chile - Puerto Montt - Puerto Varas (BL + D)

Transfer from the Airport to the Hotel. We will travel along the south shore of Lake Llanquihue to the town of Ensenada, always with the view to the volcanoes Osorno and Calbuco. The Calbuco volcano had its last eruption on April 22nd 2015. A large column of tall gas was produced that threw ash, some stones and a significant amount of lahars. The eruption caused material damage to the surrounding communities, and to many beekeepers in the area who can now tell how their recovery has been. We will visit a small beekeeper in Ensenada, and this time we will know firsthand how these specialized farmers produce delicious honey. Then we will visit the Petrohué Falls, the ideal place to see the impressive waterfalls and the spectacular native forests. We will enjoy nature and impact your senses with a walk through the Valdivian jungle. Return to your Hotel and Dinner. Accommodation at Hotel in Puerto Varas.

Day September 2nd. 2023 Puerto Varas - Chiloé Island (B+L+D)

Breakfast. The Apicultural Tour to Chiloé Island is an excellent opportunity to explore the fauna and flora of the island through visits to two emblematic places. First, we will visit Quemchi, to learn about the local culture and visit the apiaries' utopia. We can learn about the honey processing, see some of the hives, as well as know the Mapuche-Huilliche culture through local crafts. Lunch. The second place we will visit will be Chepu Rural. Return to Puerto Varas.

Dinner and Accommodation at the Hotel in Puerto Varas.

Day September 3rd. 2023 Puerto Varas - Puerto Montt - Alerce Andino National Park (B+L+D)

Breakfast. Today we will travel to Puerto Montt and see small local apiary producers. The apiary craft, its history behind its bees, its breeding practices, extraction and processing methods of their honeys will be explained. Then we will have the opportunity to see all the processes related to honey production, from bee care to the colossal task of extraction and refinement of it. Then we will travel to explore the Alerce Andino National Park, a protected area covered with native forests and trails, plus, we will have the opportunity to traverse the forest and see up close the majestic Alerce tree, a unique and very valuable species of Chilean law that is protected by law. Accommodation at Hotel de Puerto Varas.

Day September 4th. 2023 Puerto Varas - Santiago (B)
